WSOS

Winter School on Operating Systems and Spring Meeting on Operating Systems 2016 February 22-26, 2016 Graz, Austria

Computer systems are ubiquitous in our daily life. They can be found in our private environment and in commercial systems such as industrial plants or server farms. Others are embedded into vehicles and medical devices, or control important infrastructure for communication, power supply, traffic, etc. Since we entrust these systems our personal sensitive data and sometimes also our lives, they have to be dependable under any circumstance and in every possible situation. Therefore, we invite researchers and PhD students to discuss and present their work in the area of

“System Software for Dependable Computing”

When?

Winter School: February 22-25, 2016
Spring Meeting: February 25-26, 2016

Where?

Graz University of Technology, Austria

Why?

- Lectures from international experts
- Hands-on lab
- Present work-in-progress and research results
- Opportunity to network and meet peers
- Have a great time in southern Styria
